**Subject:** Microsoft class-action suit

To Whom It May Concern,

The class-action suit filed against Microsoft by several states is groundless and a disgrace to our judicial system and the laissez-faire philosophy. The individual states have no valid argument or claims against Microsoft and its unethical to even consider it. Microsoft has done nothing to these states, businesses or their citizens that could in any way warrant a law suit with compensatory damages. Let's call it what its is - a sham. Consider this - If the DoJ rules in favor of the states, they will be setting a case law precedence for future decisions that could cause severe damage to our free enterprise system for ever. Rule against this class-action suit - It's not only the right thing to do, it's the only thing to do.
